

George Bailie Joins Corplex's Engineering Team

Lake Bluff, IL (Monday, May 19th 2008) Corplex, Incorporated, a provider of remote television broadcast facilities has announced that George Bailie joined the company as a Remote Engineer.

Bailie recently served as EIC for Remote Broadcasts, Inc. in Denver, Colorado. During his time with RBI he engineered every truck in their fleet and became Chief of Engineering. Bailie also has significant audio/video experience as a mixing engineer and has experience at the A1, A2, V1, V2, camera, and videotape positions. He was responsible for recording and mixing all live studio sessions for Entercom Radio in Denver, including such artists as Melissa Etheridge, James Blunt and Los Lonely Boys. George is a native of the Denver area and has lived there most of his life. He graduated with a degree in Recording Arts from Full Sail University in Winter Park, FL.

"We are pleased to have George as part of the Corplex family" said Scott West, Corplex's President and partner. "His experience and positive attitude are a perfect match for our continuing focus on providing superior technical service and client support."

Corplex is a leading provider of remote production broadcast facilities to the major networks including coverage of NFL Football, NCAA Men's Basketball Tournament, Masters, PGA Championship, and NBA Playoffs. The company is privately held, managed, and owned by partners Carter Ruehrdanz, Scott West, Dave Greany and Robert Danko. Corplex is headquartered in the northern suburbs of Chicago, IL
